

## electronic Regulatory Reporting (eRR)

The industry standard solution to cross-jurisdictional regulatory reporting

Equias' electronic Regulatory Reporting (eRR) is the industry's response to compliance obligations for energy trading companies in Europe.

Regulatory reporting requirements have a significant impact on operational processes and systems.

Equias' eRR is your solution to address REMIT, EMIR and other compliance obligations including ECom, FinfraG and the impact of further regulations, such as MiFID II and MAR.

## The largest EU energy on-line community

eRR enables you to report both on your own behalf and on behalf of others (e.g. counterparties) providing an on-line view of the reporting status to both parties. eRR is used by the majority of EU brokers and exchanges for reporting order and trade data under REMIT and provides a similar consolidated multi-venue view of what is being reported on your behalf by each venue.

eRR provides Straight Through Processing for regulatory reporting, using open industry standards and interfaces to provide connectivity between reporting parties, regulatory repositories and reporting mechanisms.

## Is your company interested in eRR from Equias?

### eRR benefits

- ▶ Largest and most comprehensive reporting solution for energy traders in Europe
- ▶ Reduced risk of non-compliance when faced with unclear requirements through use of independent standard interfaces and processes
- ▶ Outsources cost and complexity of continual regulatory change
- ▶ Choice of automated and manual interfaces to meet individual needs

### eRR benefits for traders

- ▶ Centralised real-time monitoring and control of your reported data for all European regimes
- ▶ Access to and control of reporting made on your behalf by venues and counterparties

### eRR benefits for venues

- ▶ Free of charge for use by venues
- ▶ Preferred reporting service for over 1,500 traders active in EU energy markets

Meet your EU regulatory needs in one place
